# FAPI-SIG Community 31<sup>st</sup> Meeting

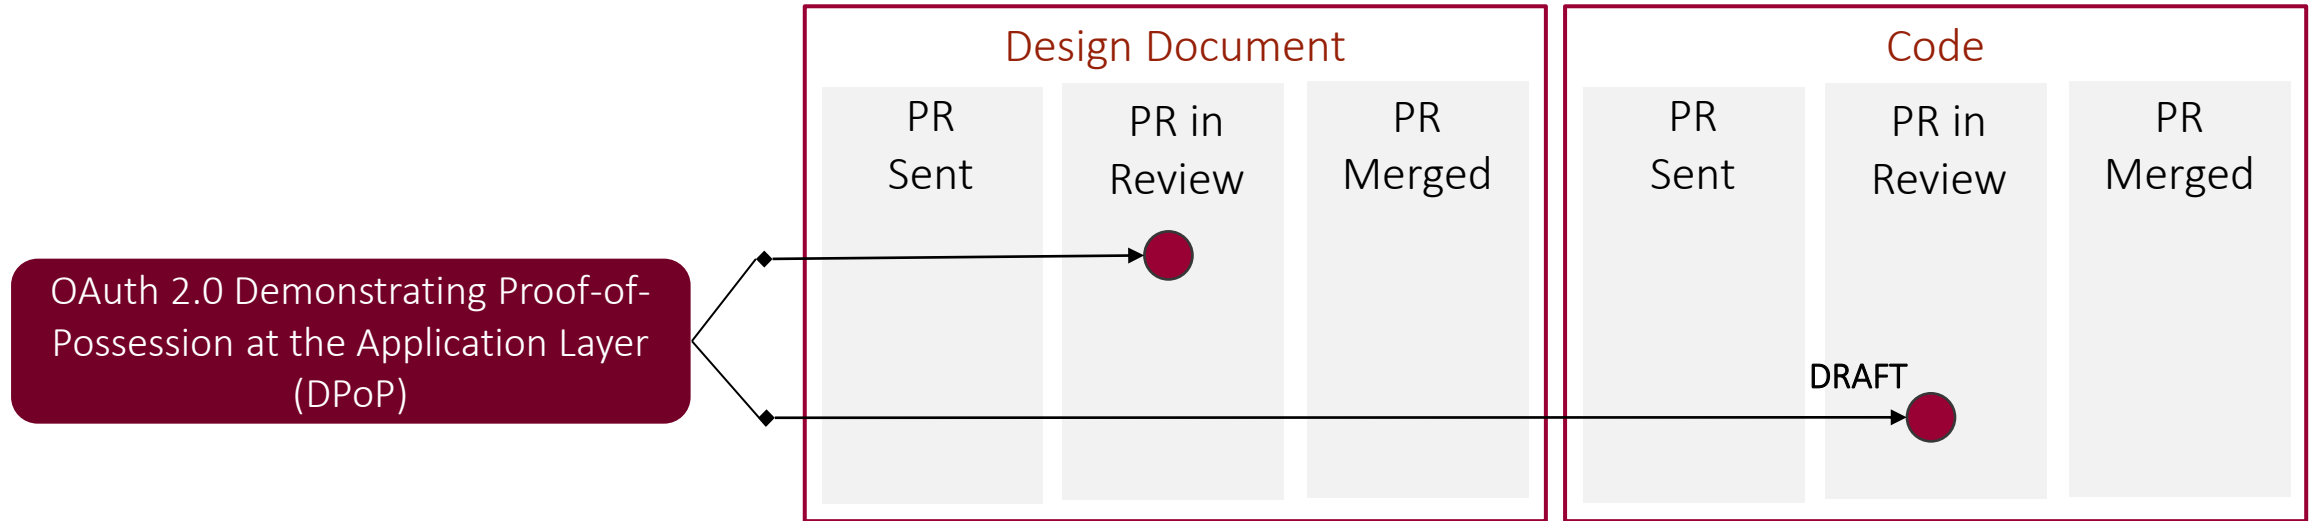

# Table of Contents

Discussion : DPoP

Discussion : RAR/Grant Management API

Discussion : OAuth2/OIDC endpoint specification in OpenAPI

# Discussion : DPoP

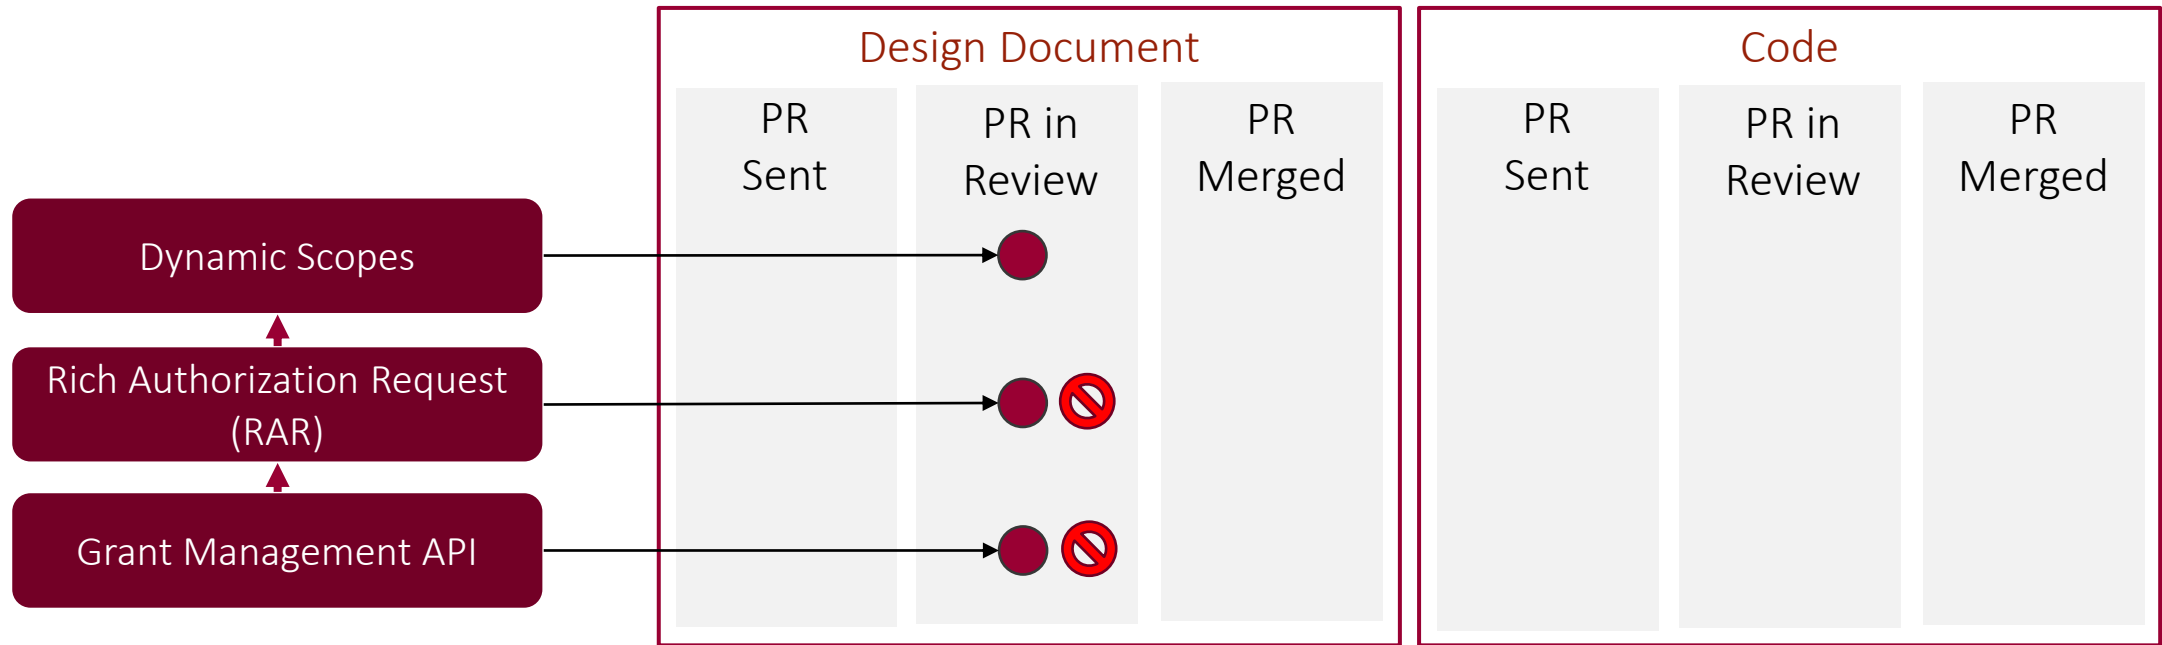

PR(code) <https://github.com/keycloak/keycloak/pull/8895>

PR(design document) <https://github.com/keycloak/keycloak-community/pull/254>

**Update** : along with DPoP, UserInfo endpoint's error response will be fixed to comply with OIDC spec.

# Discussion : RAR/Grant Management API

Dynamic Scopes PR(design document)

<https://github.com/keycloak/keycloak-community/pull/325>

Rich Authorization Request (RAR) PR(design document)

<https://github.com/keycloak/keycloak-community/pull/266>

Grant Management API PR(design document)

<https://github.com/keycloak/keycloak-community/pull/265>

Update : Nothing

# Discussion : OAuth2/OIDC endpoint specification in OpenAPI

Discussion : <https://github.com/keycloak/keycloak/discussions/8899>

Is it useful to document OAuth2/OIDC related endpoints specification in OpenAPI?

Might be beneficial for...

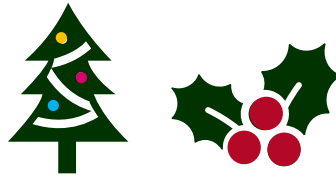

- The keycloak customers who need to know which response (including error response) is returned from which endpoint in which situation in detail in advance.
- The client app developers who want to check whether their app comply with an Authz server's endpoint spec automatically, in CI/CD pipeline.
